

NCGR Education Program “Toward Mastery and Certification”

Online Course

Reading the Chart - Natal & Predictive

This course is suitable for students on levels from Intermediate to Advanced.

The focus is on reading the **natal chart**, as well as **event analysis**, using Transits, Progressions and Solar Arc Directions.

The goal is to provide a structured, systematic approach to the chart reading, applying knowledge that is equivalent to NCGR Level-I and Level-II courses.

Natal Chart: Identify behavior and personality, personal life circumstances, the major issues, potentials, work, material resources, and other.

Event Analysis: using Transits, Progressions and Solar Arc Directions - Identify the astrological ‘forces’ that are operative at specific events, how to integrate them and how to prioritize the various techniques into a coherent message and insight.

The class is participatory and dynamic: In addition to teacher presentation, the student are asked to provide full, or partial analysis of natal charts and related event.

See more details below.
